What's new in F# 6

Kathleen Dollard |> @KathleenDollard

Don Syme |> @dsymetweets

What is F#

What Kathleen is Loving

- Comprehensions (List expressions)
 - General clean look (I now love indentation-aware syntax)
 - Type inference, succinctness
 - Loving discriminated unions (also options)
-
- Still many things to improve!

Pipeline Debugging!

- Also shadowing on values shown in debugging

expr[idx]

- We discuss why this matters
- We lose people for no reason
- “Making F# better by moving it towards it already was”
- F# is moving to be even simpler
- (C# is moving to somewhere different than it started, which is inherently complexifying)

task { .. }

- We discuss why this matters
- Discuss design approach a little

Doc improvements

- FSharp.Core examples (500)
- docs.microsoft.com/dotnet/fsharp/
- Call to action. Stackoverflow is becoming a problem for us

Huge thank you to contributors

- FSharp.Core examples (500)
- docs.microsoft.com/dotnet/fsharp/
- <https://devblogs.microsoft.com/dotnet/whats-new-in-fsharp-6/#thanks-and-acknowledgments>
- Mention general improvements in .NET
- Mention general improvements in Visual Studio
